

Create a project

The Project Zone website homepage provides a personalised view of PENTA-related information for e.g. projects, project ideas, calendar, etc.

A short list of “My projects” is presented (based on your role in PENTA). To access the full “Projects” overview, one can navigate via the top menu item “Projects” or click the button “Project overview” in the “My projects” section. This page provides a personalised view of the projects based on your role in PENTA. One is also able to search in the projects list via the search at the top of the page.

By clicking on a project name one will be directed to a page dedicated to that project providing more specific project details.

To create a new project, the Project Leader can click on the “Create New Project” button below the “My projects” list on the Project Zone website homepage or via the top menu item “Projects”.

When the Project Leader has clicked the button “Create New Project” he/she will be asked to fill in some basic information about the proposal (acronym, full title, description, start/end dates, etc.).

Project Leaders are expected to address all confidentiality issues in relation to their own projects.
