

@CDTIoficial

IMPORTANT INFORMATION AT FPP SUBMISSION

The leader of the Spanish sub-consortium (country coordinator) **must apply for funding at CDTI within 15 days after the submission of the FPP (Full Project Proposal).**

This application needs to be registered through CDTI's portal (<https://sede.cdti.gob.es/>). Once logged in, please select the type 'International cooperation projects' and afterwards subtype 'Eureka projects'. The information to be registered includes the list of the Spanish partners and their budget. The following two documents must be included under the Documentation chapter:

- The FPP as submitted in the Euripides²/Penta portal (in English)
- The 'Solicitud de asesoramiento' template filled by each Spanish company (in Spanish) describing their particular contribution to the global project (highlighting R+D activities)

It is a mandatory procedure, and CDTI will only support the projects that have followed it. Please note that this is not the complete funding application process but the first step of the national funding application submission.

CDTI will open the complete national application for each company involved in a labelled Euripides²/Penta project. The companies will then have 20 days to fulfil the whole process.

It is highly recommended to contact the Spanish representative to get all the details of this process.
